### Environment Policy

As a company operating in the ICT sector and providing engineering services on a global scale, Centro adopts an environmentally friendly approach and is determined to minimize its environmental impacts. In this regard, our company will adhere to the following principles:

- **Effective Use of Natural Resources:** We are committed to using and protecting natural resources effectively during drive testing and other field operations. We aim to reduce our environmental impact by optimizing our energy and water consumption.
- **Waste Management and Recycling:** We will continuously make improvements to reduce, recycle and properly dispose of our waste at source. We will strive to minimize waste.
- **Assessment and Control of Environmental Risks:** We will take measures to determine and control the environmental impacts of our business processes. We will constantly review the necessary measures to minimize environmental risks.
- **Following Best Practices:** Beyond legal regulations, we will strive to comply with international environmental standards and best practices. We aim to continuously improve our environmental performance by benefiting from the experiences of our global customers.
- **Employee Training and Awareness:** We will organize regular programs to educate and inform all our employees about the environment. In this way, we will ensure that our employees are more sensitive about environmental impacts.
- **Continuous Improvement and Evaluation:** We will continuously monitor, evaluate and take the necessary steps to improve our environmental performance. In this way, we will support our efforts to protect natural life and the environment.

With this policy, Centro reflects its responsibility and commitment to the environment. We expect all our employees to adopt and implement this policy.
